

G-COE 'Rebuilding Cities for Cultural Creativity and Social Inclusion' Application Rules for Young Special Researchers - February 2010 Applications -

The Global Center of Excellence (G-COE) research base 'Urban Research Plaza' is seeking applications for G-COE Young Special Researchers for 2010 according to the terms below in order to support proactive and world class research activities by young researchers.

Two course classifications have been set up based on research style for G-COE Young Researchers. In 'A', the Global Course, the researcher conducts research activities such as field work and presentations at international conferences under the general supervision of a host research advisor. In 'B', the Meister Course, the researcher pursues an independent research project that is closely linked to the host researcher's own project. Please see the attached chart of research themes and researchers able to act as host researchers, and make applications appropriately.
